Exam 000-646: Rational Manual Tester

Question: 1

A tester deletes a statement from the Reuse view. How does Rational Manual Tester update scripts that reference the statement?

- A. The statements are removed from the Reuse view and removed from all test scripts that reference them.
- B. The statements are removed from the Reuse view, and made local in all the test scripts that reference them.
- C. The statements are removed from the Reuse view and flagged as removed in the scripts that reference them.
- D. The Statements are removed from the Reuse view but the statements are still referenced in the scripts in which they were used.

Answer: D

Question: 2

When executing a test, what does a small brown box indicate?

- A. Manual Tester execution stopped.
- B. The executing line is a Verification Point.
- C. Paste Data or Compare Data is available to the tester.
- D. A screenshot can be associated with this Verification Point.

Answer: C

Question: 3

A tester needs to create tests that include many application screenshots, most of which already exist in files from creating the user manuals. What is the easiest way to incorporate these into the tests?

- A. Open the user manuals; select and copy each screenshot image; paste images into the RMT test
- B. Using the RMT Capture Image feature, choose the Graphic File on Disk option; browse to the file location
- C. Open the user manuals; using the RMT Capture Image feature, choose the Region on the Screen option; select each screenshot
- D. Copy the screenshot files into the same folder as the RMT test; use the RMT Capture Image feature to add each image into the RMT test

Answer: B

Question: 4

A client's tests are written in Microsoft Word, with each step a row in a table. Which statement is true about importing these tests into RMT?

- A. The import automatically preserves the table formatting.
- B. The client must check the Preserve Formatting checkbox for RMT to keep the table formatting.
- C. They have an RMT test with listed steps because RMT does not support Microsoft Word tables.
- D. Each row becomes a step, not part of a table (but they can copy-paste the table into a single step within the RMT test).

Answer: D

Question: 5

- A. getDestinationFile() and run()
- B. formatAndExportEvent () and run()
- C. setDestinationFile and HtmlFormatter
- D. formatAndExportEvent () and getDestinationFile()

Answer: B

Question: 6

What should testers do to make it possible for their tests to verify the color and font for a title of a particular window?

- A. Insert a Compare Data verification

- B. Insert a region image into the manual test
- C. Refer to an attachment that has a screen shot
- D. Describe what the window should look like in a step in the manual test

Answer: B

Question: 7

When the tester exports a test execution log, what does the resulting file contain?

- A. Reporting points, execution comments passes and failures for each event
- B. Failure events only and any associated screen shot that was captured during authoring of the script
- C. Custom result (the contents of the Result property) instead of the standard result (the verdict) for each event
- D. Standard result (the verdict) instead of the custom result (the contents of the Result property) for each event

Answer: C

Question: 8

How can a customer print out test results showing all information, including screen shots and custom properties for a specific test log?

- A. Select Print from the File menu to print the test logs
- B. Select Print from the File menu and check the Show Images and Show Properties checkboxes
- C. Use IBM Rational SoDA to create report with the required test results information; print the generated document
- D. Export the basic data into csv format; open the exported file in a word processor; manually add the images and custom properties data into a file for printing

Answer: D
