Exam 000-743: IBM Storage Sales, Version 7

Question: 1

A remote backup and recovery site within 50 miles of headquarters requires 7 x 24 x 365 data availability in a heterogeneous UNIX environment. Which of the following IBM storage functions best meets the customer's business continuance requirements?

- A. Global Mirror
- B. Metro Mirror
- C. FlashCopy
- D. High Availability Cluster Multiprocessing

Answer: B

Question: 2

A rapidly growing distributor is concerned with the possibility of a natural disaster occurring in the area. They currently have two IBM UNIX servers, both being backed up nightly to an IBM TotalStorage 3584 Tape Library. Tapes are taken offsite nightly. In order to help the customer achieve the next level of disaster recovery protection, which of the following is the most cost-effective recommendation?

- A. Add additional LTO drives to their library and make two copies of their data nightly.
- B. Move the IBM TotalStorage 3584 Tape Library to a remote location and perform backups nightly.
- C. Install the IBM System Storage 7710 at their site and make multiple copies of their data that can be restored quickly.
- D. Duplicate their existing environment (servers and library) at a remote location.

Answer: B

Question: 3

An IBM storage specialist is talking to a client regarding their current tape library and backup strategy. Which of the following would be most appropriate to identify the customer's business challenges?

- A. What tape technology is currently being used?
- B. How many tape drives are in the library?
- C. What software is being used for backup?
- D. Has there been any recent loss of data?

Answer: D

Question: 4

In a recent customer meeting, the data center director described ever increasing application storage requirements. Furthermore, the director wants to consolidate storage from multiple, heterogeneous storage arrays onto a single, high performance, highly scalable storage server. This migration and consolidation needs to be performed quickly and with minimum application downtime. Which IBM product should the sales specialist discuss with the customer?

- A. SAN Volume Controller
- B. Tivoli Storage Manager
- C. SAN File System
- D. Enterprise Remote Copy Management Facility

Answer: A
