Exam 000-965: XIV Storage System Technical Solutions Version 1

Question: 1

Titan Communications is a provider of cable TV, wireless, and wireline phone services. Its stated business objective is to transition from a product centric to a customer centric organization. What is the primary benefit that an SOA would provide Titan?

- A. Improved business/IT alignment.
- B. Improved quality of customer service
- C. Consistency in behavior across customer channels
- D. Agility to change processes or introduce new products quickly

Answer: A

Question: 2

Felicity Financial Services is a full service brokerage. Their primary business objective is to be the premier provider of tailored services to leading edge investors in areas of fixed income securities, vanilla and exotic derivatives, and whole loan investments. What is the primary benefit that an SOA would provide Felicity?

- A. Improved business/IT alignment.
- B. Improved quality of customer service
- C. Consistency in information and behavior across channels
- D. Agility to change processes or introduce new products quickly

Answer: D

Question: 3

Chasm, Inc., a clothing retailer, is executing on their SOA program. They have created a reference architecture, roadmap, constructed common services such as single-sign on, have identified project priorities. Some members of IT management are unaware of the SOA program, while other managers are unclear as to why they are undertaking it. One of these managers is responsible for deploying a new system in support of new promotions. Which of the SOA domains could most use improving (choose two)?

- A. Business Process & Strategy
- B. Architecture
- C. Costs & Benefits
- D. Building Blocks
- E. Projects & Applications
- F. Organization & Governance

Answer: C, F

Question: 4

Great North Travel is a multi-national travel agency implementing an SOA program. The program was sponsored by the highest levels of both business and IT management, and is seen as a key tactic to their customer satisfaction improvement and new product introduction strategies. A number of in-progress initiatives are using various EAI technologies to perform integration, and there is no sharing of artifacts among these initiatives. Furthermore, these initiatives all seem to be developing separate, and overlapping, customer data stores. Which of the SOA domains could most use improving (choose two)?

- A. Business Process & Strategy
- B. Architecture
- C. Costs & Benefits
- D. Building Blocks
- E. Projects & Applications
- F. Organization & Governance

Answer: D, F

Question: 5

Acme Builders, inc. has created an SOA roadmap, reference architecture and has exposed an initial handful of data access and shared business services. The development team currently handles all requests for support, diagnosis, and connectivity to these services through manual / ad hoc means. The number of consumers of these services is growing. Which two service lifecycle phases are currently the most appropriate to their SOA transformation program?

- A. Monitor
- B. Design

- C. Expose
- D. Build
- E. Compose
- F. Secure

Answer: A, F

Question: 6

Serendipity Securities, Inc. has two major business objectives:

Ensure consistent customer information and service capabilities across all product lines and all customer channels (interactive voice response, call centre, and website)

Maintain business unit autonomy so new products and/or services can be introduced in a timely fashion.

What is the likelihood of achieving all the objectives through an SOA program?

- A. Both objectives can be met; both agility and consistency are complementary.
- B. It is unlikely the objectives can be met because agility and consistency are contradictory.
- C. There is a tradeoff between agility and consistency in dealing with product information, and some compromise must be made between the business units
- D. There is a tradeoff between agility and consistency in dealing with customer information, and some compromise must be made between the business units

Answer: D
