Answer: A, B, D

Question: 3

You work in an international company which is called Wikigo. And you're employed as the Developer for Microsoft Dynamics NAV. You have set up two dimensions: one for Department with values of Sales and Administration, and then one for Region with values of East, West, and Central. For customer 10000, you assigned the Region dimension with a value of West and the Department dimension with a value of Sales; the Value Posting rule is blank for both dimensions. For G/L account 6100, the Department dimension is assigned a value of Administration and the Value Posting rule is set to Same Code. In the Default Dimension Priorities, the priority is set to 1, for the Source Code of GENJNL and Table ID 18 (Customer). A user selects customer 10000 and then selects G/L account 6100 as the balancing account on a single journal line. When the user posts the entry, what happens?

- A. The entry will not post
- B. Region is West, Department is Sales
- C. Region is blank, Department is Sales
- D. Region is blank, Department is Administration

Answer: A

Question: 4

You work in an international company which is called Wiikigo. And you're employed as the Developer for Microsoft Dynamics NAV. Microsoft Dynamics NAV has the functionality of reversing Customer Ledger Entries. When you reverse Customer Ledger Entries, what restrictions are enforced?

- A. The Customer Ledger Entry must not be applied
